SUMMARY

As a recent graduate with a degree in Computer Science, I am a passionate and eager web developer with a solid understanding of modern web technologies and development practices. My academic projects have given me hands-on experience in front-End development, allowing me to create responsive, dynamic, and user-friendly websites.

My projects include developing a personal portfolio website, an e-commerce platform, and a blogging system, all of which demonstrate my ability to handle various aspects of web development from conceptualization to deployment.

With strong problem-solving skills, a keen eye for detail, and a collaborative mindset, I am excited to bring my technical expertise and enthusiasm to a forward-thinking team. I am seeking an opportunity to grow and contribute as a web developer in a challenging and dynamic environment.
